US (M)	3 ½ - 7 ½	7 ½ - 11 ½	11 ½ - 15
US (F)	4 ½ - 8 ½	8 ½ - 12 ½	12 ½ - 16

Available in 3 sizes, can be used for left and right foot.

VACO talus

	Small	Standard
EUR	≤ 40	≥ 40
UK	≤ 6,5	≥ 6,5
US (M)	≤ 7,5	≥ 7,5
US (F)	≤ 8,5	≥ 8,5

Available in 2 sizes, for left and right foot.

- Corrects the height difference between the good and injured leg
- Ensures a harmonic gait
- Easy to attach to any flat shoe
- Can be used for the left and right foot

OPED – Keeps you going.

We at OPED are experts in medical technology. All our high quality orthopaedic rehabilitation products are developed and designed in Germany.

Our goal: A mobile patient.

Product Features

VACOped Provides True Equinus Position

ROM allows more than 30° plantar flexion in a fixed position during the initial phase of AT repair.

Orthosis with wedges

Vacuum Orthosis (VACOped)

Early Protected Weightbearing for Acute Ruptures of the Achilles Tendon: Do Commonly Used Orthoses Produce the Required Equinus? P. Ellison et.al. Aintree University Hospital. The Journal of Foot & Ankle Surgery 2017, vol. 56, issue 5, pp. 960–963.

Customised Treatment Protocols

OPED provides individualized treatment protocols tailored to your hospital, visualizing your treatment concept at a glance.

Motion Makes the Difference – the 2 in 1 System

Advantages at a Glance

- The only proven cast-stable orthosis through VAC012 technology
- The patented Range of Motion (ROM) is easy to set up and allows fixation and dynamic treatment

Advanced Treatment of Achilles Tendon Ruptures (ATRs)

- Fast and easy adjustment to a true equinus position (30° plantar flexion) for the initial phase
- Flexible adjustable in 5° steps from -15° to +30° for dynamic treatment
- Advanced technology resulting in greater clinical outcomes and also allowing for conservative management

VACO^{® by OPED}

For Stable Treatment of the Ankle Region

2 Limitation of talar shift by the Talusstrap

- 3 Natural flow of movement of the foot remains possible through plantar/ dorsal movement
- Anatomically pre-moulded outer shell with excellent rigidity for effective stability against pronation/supination
- 5 VACOR pad for optimised adaptation to individual anatomical requirements

Advantages at a Glance

- Tangible limitation of talar shift through the Talusstrap
- Excellent grip around the ankle area thanks to VACO12 cushion
- Slim design to allow it to be worn easily inside a shoe

High Efficacy and Low Risk

Scope of Indications/ Applications

- Patients at high risk of DVT
- Excessive swelling
- Can be used for post trauma, or post operatively
- Prophylaxis of compartment syndrome and post-fasciotomy

OP/Treatment Success and Time Saving Ensured by

- highly effective prevention of DVTs and PEs.
- an average of 1.7 days earlier operation, and 3.6 days earlier discharge.
- significantly lower complication rates
- faster and better wound healing.

VACO Cost

The VACOcast is a cast-stable orthosis for the immobilisation of the foot and ankle. Therapy with VACOcast accelerates the healing process and makes earlier weight bearing possible.

Indications

- Ankle fractures
- Metatarsal fractures
- Calcaneus fractures
- Severe distortions
- Prosthetics
- Arthrodesis

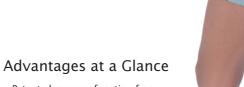

Advantages at a Glance

- Stable as a cast, can be applied directly after surgery.
- Vacuum cushion forms perfectly to individual patient's anatomy and can be adjusted to accommodate swelling and atrophy. • Easy wound control simplifies treatment.

The VACOped, being the modern standard of care for Achilles Tendon Repair, is a cast-stable functional orthosis for the immobilisation and later dynamization of the foot and ankle. Treatment with VACOped has been proven to provide superior results in treating ATR conservatively. It shortens the recovery process and allows patients to weight bear earlier.

Main Indications

- Achilles tendon ruptures
- Ankle fractures
- Fusions

- Patented ranges of motion from -15 to +30° allows real equinus and dynamic treatment.
- Superior functional outcomes in ATR with conservative treatment that is comparable to surgical intervention.
- Accelerated healing results due to increased glutamate levels.
- Reduction of in-patient admissions Earlier weight bearing by removing the need for casting.
- OPED service to provide individual treatment protocols visualizing your treatment concept.

VACOpedes is the modern standard of care for injuries to the metatarsal and forefoot. Optimum pressure relief in the forefoot means that the healing process is accelerated and the patient gets back to everyday life sooner.

Indications

- · Metatarsal fractures I-IV
- Hallux valgus/rigidus
- Arthrodesis of the toe joints
- Hammer toe and claw toe
- Lapidus procedure

Advantages at a Glance

- Pressure relief in the forefoot area. · Immobilisation of the forefoot with full mobility in the ankle.
- Toe cap with possibility of toe extension.
- The orthosis can be taken off and put back on again at any time. Easy wound control simplifies
- treatment. Radiolucent.

- accommodate it.

comfort.

- - - easily inside a shoe.

Indications

- ankle joint
- the ankle joint
- instability

VACOtalus provides excellent rigidity with effective stabilisation against twisting. Joint movements in the supination and pronation plane must be prevented and the talar shift must be limited by the Talusstrap. Plantar/ dorsal movement remains possible, with the normal movement process of the foot being retained when walking.

 Acute ankle ligament injuries • After-care for fractures of the

 Prevention of ligament lesions on Compensation of ankle joint

Advantages at a Glance
